

## Weekly Wednesday Evening Central Florida CW Net (CFLN)

(PURPOSE) To foster a semi formal Central Florida CW net sponsored by LMARS.org. The net would be open to anyone in the central Florida area who wishes to participate. Central Florida is described as those six counties making up the nucleus of central Florida. Those counties are: Orange, Seminole, Lake, Volusia, Brevard and Polk. Local CW operators from any of the central Florida Amateur Radio Clubs are invited to participate with the intent of building a more active local CW formatted interest group and to further foster Morse fellowships.

(MEMBERSHIP) Membership numbers will be issued to anyone who applies and whose callsign is verifiable in QRZ.com confirming callsign registration in one of the six central Florida counties as listed above. Membership numbers will be assigned as follows depending upon an applicants home address.

CFLNO-xxx (Orange Cty)  
CFLNS-xxx (Seminole Cty)  
CFLNL-xxx (Lake Cty)  
CFLNV-xxx (Volusia Cty)  
CFLNB-xxx (Bervard Cty)  
CFLNP-xxx (Polk Cty)

To obtain a LMARS CFLN number send a Email request to [kj4hui@excite.com](mailto:kj4hui@excite.com). Please include name and callsign.

(FORMAT) The net will be a semi formal net subject to changes as needed. After role-call, each station will be given a turn and then when called with a QRV can contact and send a short message (usually 30 words or less) to any other station checked into the net and/or to the net control station/N4EH. After each QSL, N4EH will QRV the next in line station until all stations have had their turn and announce that they are QRU AR

(LOGGING) N4EH (along with others) will copy all net transmissions sent to N4EH, make a log copy of the check-ins and messages sent to N4EH. Subsequently, N4EH will make arrangements for the log to be posted up on the LMARS Website under "LMARS Weekly CW Net" for the disposition of any and all interested parties.

(Q-SIGNALS) Q-Sigs should be limited to a minimum in that the net is intended to be semi formal. The following Q-Sigs may be expected:

QNC - All stations copy (used to make general announcements)

QNI - Net stations check in\*\* \_\_\_\_\_ I am checking in

QNE - Standby

QNN - Net control station is \_\_\_\_\_

QNS - Following stations have checked into the net (list)

QRV - Send your traffic/message

QSL - Acknowledge your message

QSO - Contact

QRT - Stop sending
